

A LOOK AT THE IMPACT OF THE RESEARCH INTERMEDIARIES OPERATING IN THE ICT INDUSTRY IN THE PROVINCE OF QUEBEC

Stéphane Dauphin-Pierre, PHD candidate in Industrial Engineering

Catherine Beaudry, Professor in Industrial Engineering

Polytechnique Montréal

Key Concepts And Context

● Research intermediary (RI):

- *“An organization or body that acts as an agent or broker in any aspect of the innovation process between two or more parties. Such intermediary activities include: helping to provide information about potential collaborators; brokering a transaction between two or more parties; acting as a mediator, or go-between, bodies or organizations that are already collaborating; and helping find advice, funding and support for the innovation outcomes of such collaborations.”* (Howells, 2006)

ICT Industry In Quebec

- Revenue of over 31,8 billions
- Over 7,800 companies and 255,900 workers
- Almost half of these workers work in:
 - Software development
 - Microelectronics
 - Multimedia
 - Optics-photonics
 - Consulting services
 - Telecommunications
 - Cloud computing services
 - Artificial intelligence
- More than 70% of the ICT generated GDP in Quebec comes from the Montreal Greater Region

Methodology

- Research question:
 - What are the impacts of RIs in ICT in Quebec's innovation ecosystem?
- Exploratory case study
- Semi-structured interview and data from the Web
- Eight (8) themes discussed
- Four (4) RIs
- Based in Quebec
- Active in the ICT industry

Results

- Three major roles in the innovation ecosystem:
 1. Strengthen the innovation ecosystem
 2. Facilitate communication amongst the actors in the ecosystem
 3. Fostering a culture of collaboration throughout the research environment

Results: Strengthen The Innovation Ecosystem

		RI1	RI2	RI3	RI4
Improve the structure of the innovation ecosystem	Structure the innovation ecosystem	X	X		X
	Offer a physical space that is adapted to R&D	X			
	Create a space to centralize ICT services	X			
	Offer additional production	X			
	Fund research projects	X	X	X	X
	Conduct a situational analysis			X	
	Support R&D activities	X			X

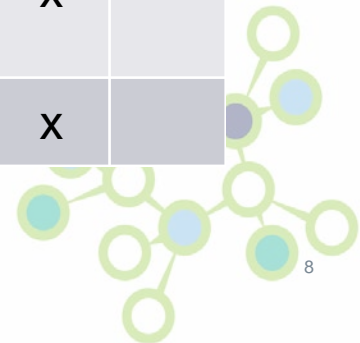

Results: Strengthen The Innovation Ecosystem

		R11	R12	R13	R14
Improve the quality of the actors in the innovation ecosystem	Attract researchers in the field				X
	Train future staff		X		X
	Link the innovation ecosystem on an international level		X		X
	Attract foreign financing	X	X		X

Results: Strengthen The Innovation Ecosystem

		R11	R12	R13	R14
Improve IS results	Favor the economic development of the country	x	x		
	Stimulate innovation		x	x	x
	Coordinate large projects in the field		x		x
	Favor market-driven R&D	x			
	Accelerate technology commercialization	x			
	Favor the adoption of new technologies or new practices			x	
	Technology or service transfer	x		x	

Results

		RI1	RI2	RI3	RI4
Facilitate communication	Disseminate information		X		X
	Disseminate information from the field to the publics	X		X	
	Influence the government		X	X	X

		RI1	RI2	RI3	RI4
Foster a collaboration culture	Facilitate partnerships	X	X		X
	Promote cross-sectorial exchanges	X		X	

Results : Cross-Sectorial Transfer Practices

● RI2

- Multi-sector project opportunities at the request of members

● RI3

- Projects with a multi-sectorial component to attract people from a variety of industries
- Research projects may lead to the development of services that will be spined-off or spined-out

● RI4

- Multisectorial projects arise spontaneously where skills from different sectors are integrated into a joint research
- Cross-sectorial partnership promotion with RI from other sectors
- Cross-sectorial exchanges within SMEs

Conclusions

- Each of these RIs have different impacts and roles on the innovation system.
- They all provide some form of funding to the actors in the system.
- RI1, RI2 and RI4 have a great impact on industrialists and researchers.
- RI3 adds an impact on the public and the government.
- There is therefore somewhat of a member selection across the network and the benefits may not apply to everyone.
- Three of the four RIs offer some openness to the exterior but they may lack the resources to go further
- Opportunities for multisectoral projects could emerge if a more conscious effort was made on this objective and if the RIs shared good practices on the subject.

● Thank you
